June 17, 1982

Mr. Kermit Geary
R.D. 4, Box 321
Walnutport, PA 18088

Dear Mr. Geary:

This letter will serve as confirmation that you received in Walnutport, Pennsylvania, between 3:35 and 5:00 P.M. on May 31, 1982, the signal of WPBT, Miami, Florida.

WPBT broadcasts on Channel 2, from an antenna having a center of radiation which is 930.5 feet above mean sea level, 922.5 feet above average terrain. The signal is circularly polarized, having 100kw peak visual Effective Radiated Power in both horizontal and vertical polarity.

Thank you for your report. We're always interested in hearing about unusual propagation effects, and try as much as we can to tie them in to the existing atmospheric conditions.

Sincerely,

Graham R. Simmons
Chief Engineer
